

MECHANICAL TECHNIQUES - SMALL ENGINE MECHANIC

Program Outline

Major:	MTSE
Length:	1 Year
Delivery:	2 Semesters
Credential:	Ontario College Certificate
Effective:	2015-2016
Location:	Midland
Start:	Fall (Midland)

Description

This one-year post secondary certificate program prepares an individual for a career as a Small Engine Mechanic, or further education in a related field. This program offers a concentrated understanding of 2 and 4 stroke cycle engine principles and design, with a significant hands-on component that will allow individuals to develop practical and technical skills to meet the current needs of the outdoor power products service industry, and that will provide a basis to respond to emerging trends in the field. Finally, students will become effective communicators and problem solvers who will have an awareness of environmental issues, effective customer service, and basic business operations. Once the one-year certificate has been achieved, the graduate may return for further specialization.

Career Opportunities

Graduates may find a range of occupations in the mechanical field, including manufacturing, dealers, operations, sales, service, and self-employment. A graduate may find employment in outdoor power equipment service and operations, outdoor power equipment dealerships, manufacturing, and parts and accessories.

Program Learning Outcomes

The graduate has reliably demonstrated the ability to:

- use effective communication and interpersonal skills to facilitate customer service;
- work effectively as an individual and team member in the mechanical service industry;
- utilize current technology to access information in the mechanical service industry;
- role model professional behaviour consistent with ethical and legal integrity in the workplace;
- incorporate analytical thinking to implement a systematic approach to problem solving and decision making, for the purpose of engine and equipment systems repair and service;
- incorporate the principles of customer service specific to the mechanical service industry;
- select and utilize appropriate tools and equipment to assess and repair outdoor power equipment engines and their support systems.

The Program Progression:

Fall Intake - Midland

Sem 1 | Sem 2

Fall | Winter
2015 | 2016

Articulation:

A number of articulation agreements have been negotiated with universities and other institutions across Canada, North America and internationally. These agreements are assessed, revised and updated on a regular basis. Please contact the program co-ordinator for specific details if you are interested in pursuing such an option. Additional information can be found on our website at

<http://www.georgiancollege.ca/admissions/credit-transfer/>

Admission Requirements:

OSSD or equivalent with

- Grade 12 English (C or U)

- any Grade 11* or 12 Mathematics (C, M, or U)

*Minimum of 60% in Grade 11 College or University level Mathematics (MBF3C or MCF3M)

Mature students, non-secondary school applicants (19 years or older), and home school applicants may also be considered for admission. Eligibility may be met by applicants who have taken equivalent courses, upgrading, completed their GED, and equivalency testing. For complete details refer to: www.georgiancollege.ca/admissions/policies-procedures/

Applicants who have taken courses from a recognized and accredited post-secondary institution and/or have relevant life/learning experience may also be considered for admission; refer to the Credit Transfer Centre website for details: www.georgiancollege.ca/admissions/credit-transfer/

Additional Information:

The very nature of the work requires manual dexterity and lifting. Applicants are advised to consult with the Program Co-ordinator if they have specific questions related to the physical demands of the program and future employment.

Graduation Requirements:

- 11 Mandatory Courses
 - 1 Communications Course
 - 2 Optional Courses
- 1 Field Placement

Graduation Eligibility:

To graduate from this program, the passing weighted average for promotion through each semester, and to graduate is 60%. Additionally, a student must attain a minimum of 50% or a letter grade of P (Pass) or S (Satisfactory) in each course in each semester unless otherwise stated on the course outline.

Mandatory Courses

- MATH1007 Mathematics Techniques
- MENG1000 Workshop Procedures
- MENG1001 Engine Fuel Systems Principles
- MENG1002 Engine Electrical Systems Diagnostics
- MENG1003 Engine Function and Design
- MENG1009 Basic Electrical Principles
- MENG1011 Health and Safety Fundamentals
- SENG1000 Outdoor Power Tool Fundamentals
- SENG1001 ATV Repair Principles
- SENG1002 Principles of Residential Grounds Maintenance Equipment

SENG1003 Snowmobile Repair Principles

Communications Course

To be selected at time of registration from the College list, as determined by testing.

Optional Courses

To be selected from College list

Field Placement

SENG1004 Field Placement - MTSE

Course Descriptions:

MATH1007 Mathematics Techniques 42.0 Hours

This is a consolidation and review of the principles and techniques of mathematics, which are required for the technical trades. Developing and promoting the use of mental arithmetic, estimation skills, problem solving, and reasoning skills.

MENG1000 Workshop Procedures 42.0 Hours

This course will provide the student with the necessary knowledge and skills to perform essential mechanical workshop duties. Function and safe use of hand and select power tools, measurement devices, and related equipment for the technical trades will be emphasized.

MENG1001 Engine Fuel Systems Principles 42.0 Hours

This course provides the student with an understanding of common internal combustion engine fuels, fuel supply, and fuel management systems. It also provides the student with access to relative engine fuel system manufacturer information technology.

MENG1002 Engine Electrical Systems Diagnostics 42.0 Hours

This course provides the student with an understanding of the nature of electricity and its function relating to common internal combustion engines. It also provides the student with a comprehension of electrical system diagnostics and testing procedures.

MENG1003 Engine Function and Design 42.0 Hours

This course provides the student with an understanding of the design and function of common internal combustion engines and components relative to their operation. It also provides the student with access to relative engine manufacturer information technology.

MENG1009 Basic Electrical Principles 42.0 Hours

This course introduces the student to the basic concepts of electricity. The electrical circuit is the fundamental building block for these concepts. With these concepts and OHMS law the behaviour of most electrical components will be understood.

MENG1011 Health and Safety Fundamentals 42.0 Hours

This course introduces the student to basic fundamentals of safety in the workplace, sound environmental procedures in and around the workplace and home safety. It will assist the student in identifying personal health and safety concerns and problems in the environment.

SENG1000 Outdoor Power Tool Fundamentals 42.0 Hours

This course provides the student with an understanding of the repair and general maintenance of common outdoor power tools and the systems and components relative to their operation. It also reinforces the use of information systems, specialty tools, and equipment during the practical repair section.

SENG1001 ATV Repair Principles 42.0 Hours

This course provides the student with an understanding of the repair and general maintenance of common All Terrain Vehicles and systems and components relative to their operation. It also reinforces the use of information systems, specialty tools, and equipment during the practical repair section.

SENG1002 Principles of Residential Grounds Maintenance Equipment 42.0 Hours

This course provides the student with an understanding of common types of residential grounds maintenance equipment and the system and components relative to their operation. It also reinforces the use of information systems, specialty tools, and equipment during the practical repair section.

SENG1003 Snowmobile Repair Principles 42.0 Hours

This course provides the student with an understanding of the repair and general maintenance of common snowmobiles and the systems and components relative to their operation. It also reinforces the use of information systems, specialty tools, and equipment during the practical repair section.

SENG1004 Field Placement - MTSE 160.0 Hours

Students are placed in field related agencies to apply their previously learned skills under the direction and supervision of a qualified professional.

C- BUSI1004 Service and Information Techniques and P- MENG1000 Workshop Procedures and P- MENG1003 Engine Function and Design and P- MENG1001 Engine Fuel Systems Principles and P- MENG1002 Engine Electrical Systems Diagnostics and C- SENG1003 Snowmobile Repair Principles and C- SENG1000 Outdoor Power Tool Fundamentals and C- SENG1002 Principles of Residential Grounds Maintenance Equipment and C- SENG1001 ATV Repair Principles and C- MENG1010 Diesel and

Overhead Valve Engines and P- MENG1009 Basic Electrical Principles and P- MENG1011 Health and Safety Fundamentals

Course Description Legend

P = Prerequisite; C = Concurrent prerequisite; CO= Corequisite
