

During the online test

- Make sure that you have strong internet connectivity.
- Make sure your test window is maximized.
- The test timer with the remaining time and a video window of yourself being recorded is located on the top right-hand side of the window. (if you can't see this, maximize the window)
- Select an answer and hit next question (bottom left, in red) to move to the next question. If you can't see the next question button, scroll down.
- Students may briefly encounter a screen that says processing when selecting answers and moving on to other questions.
- Students can click on question numbers at the top to move from one question to another and come back to previous questions.
- Students can select an answer and click on a different question number and the selected answer will be saved.
- Question numbers with selected answers are shown in green and question numbers without selected answers are shown in black.
- If you complete the test before the time is up, you can hit submit exam at the bottom right. When all of the questions have been answered, the submit exam button becomes red. Scroll down if you don't see this button.
- If you lose internet, when you regain connectivity, please go back to <https://absc.opilink.com/> and go back into the exam. Be aware that the timer will continue to run. After the test duration has elapsed, the test will auto submit.
- Once you have completed the test and you have submitted it, hit the "Exit App" button and Digital Lock will exit.

If you run into any issues during the test, please contact the Oliver's desk side support at:
